Touch Screen

YXD75L-ON3T

75" diagonal

This Commercial-grade large screen display offers digital signage users touchscreen capabilities with a Hi-Def 75" display at a cost-conscious price. This model is integrated with optical-imaging technology that allows for up to 10 simultaneous touches. An integrated, double-sided and anti-reflective glass layer protects the panel and prevents mirrored imaging. It features built-in 10w speakers, a public display-grade panel that protects against permanent image retention and a full selection of inputs, which allows you to connect to a wide range of peripheral devices. The touchscreen, high-performance panel and advanced technologies, make the YXD75L-ON3T ideal for corporate, retail, restaurant and wayfinding kiosks and various other interactive applications.
